

HOME CARE INSTRUCTIONS

You may experience some of the following:

EYEBROWS:

- Dryness and itching in the treated area
- Flaking in the area
- Tenderness on surface skin
- Redness and puffiness in and around area

EYELINER:

- Tenderness
- Eyelashes sticking together
- Itching
- Puffiness and/or redness

LIPS & AREOLAS:

- Dryness or scabbing in the treated area
- Blisters in the lip area

TREATMENT:

- Wash your hands before touching the tattooed area
- Ice area if swelling occurs
- Use the aquaphor as a barrier to prevent your tattoo from drying out while the healing process occurs. Apply it gently without rubbing.
- No heavy exercise or swimming for one week
- Aquaphor should be applied twice a day for two weeks.
- No eye makeup around eyeliner until healed.
- Start with a new mascara when makeup is resumed
- No glycolic acids or retin A on tattoo ever
- Sunscreens may be used daily on tattoo forever to help prevent fading
- If the treated area itches, apply direct pressure. Do not rub.
